SALMAGUNDI HACK MANUAL

Name:	Orchid	
Date:	07.04.17	
Result:	tried assuming the sequencer for the SMC* of the MIXING MACHINE	
The answer is not where you think ^{WAS} OPEN.		
It is: as in, don't open the box, assume the box is already open. We		↓ IT WAS NOT
tried using various combinations of our finger prints to open the door to the Salmagundi, Fungi lent on it by mistake, it Opened! It must not have been shut properly!		
*SEQUENCE MANAGEMENT CONTROLLER.		

SALMAGUNDI HACK MANUAL

Name:	CACTUS
Date:	18/8/2117
Result:	DONT BE RIDICULOUS!

Do Be Ridiculous! You can't hack a Machine built by the controllers! let's build our own machine! All you need is:

A Saucepan : to boil the Specimen
A Blender, A GoGoFuge, Some kind of ElectroSpectrometer thingy (can print with 3D printer), Agar Agar, Algae Microscope and Cell picker!

SALMAGUNDI HACK MANUAL

Name:	fungi
Date:	3/9/17
Result:	Don't know if Broken. ^{or just doesn't} work.

think of a pattern. Follow it to its natural conclusion where it concludes see another pattern. We're assuming that we need human DNA to intermix species because their extinct DNA is completely different and has no crossover with our species what if it does? So all the protectors put one Eyelash into the Blenderiser, there was a whirling sound, a greeny grey vapour, and then it ground to a halt.

START AT THE END. GO BACKWARDS THROUGH THE SEQUENCES. ANALYSE, THEN FIND. WE STARTED WITH THE ANALYSES OF OUR EYELASHES FROM LAST TIME. REVERSED THE SEQUENCE, MADE NEW EYELASHES FROM THIS SEQUENCE (IN CACTUS'S UNDERGROUND DIY BIO LAB!) AND PUT THESE EYELASHES INTO THE BLENDER ISER.

SALMAGUNDI HACK MANUAL

Name:	VANESSA.
Date:	
Result:	ALGA HACKED THE INFORM ATICA LOOKING FOR CLUES. CHANGE ALWAYS COMES TOO SOON. SO DONT CHANGE. DO THINGS AS YOU AL- WAYS HAVE. ROUTINE CAN BRING NEW SURPRISES. WE HACKED THE SALMAGUNDI MEMORY BIT AND DID EVERYTHING IN THE SAME SEQUENCE WE TRIED LAST TIME. THE BLENDER ISER SPAT OUT ROWS OF STRANDS AND SPIRALS BUT NO ONE UNDERSTOOD WHAT IT MEANT.
